Education

- 2021 - 2025
  Bachelor of Computer Science
  WSB University, Chorzów

- 2016 - 2020
  IT technician
  ZSTiO / Technikum nr 4,
  Tarnowskie Góry, Poland

About me

I'm a frontend developer passionate about creating modern web applications where solid architecture meets polished, delightful UX.

I primarily work with React and Next.js, always focusing on clean code structure, visual clarity, smooth interactions, and that satisfying "it just feels good to use" experience.

I grow the most hands-on: by building real features, testing them thoroughly, iterating based on real usage, and constantly refining both the technical foundation and the user-facing details.

Experience

- 2023 - 2025
  Web Developer
  - Led content refreshes and rolled out new functionalities + technical optimizations in direct response to business needs, ensuring alignment with strategic goals.
  - Optimized UX by restructuring information flows, achieving full device responsiveness, and adding smooth, engaging interactions that improved user satisfaction.
  - Identified and fixed critical performance issues, slashing load times substantially while enhancing system stability and reducing downtime.

  BBB Industries, Zabrze

- 2023
  Front-end Developer
  - Designed and implemented new features and custom sections for the company website, enhancing its functionality and user offerings.
  - Improved the user interface by introducing visual and functional updates to the site, delivering a more modern and intuitive experience.
  - Optimized page structure and logic to boost usability and conversion rates, focusing on smoother navigation and higher user engagement.
